

~~SECRET~~ NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----  
PROJECT NUMBER: 8728

SESSION NUMBER: 1

DATE OF SESSION: 02 DEC 87

DATE OF REPORT: 03 DEC 87

START: 1328

END: 1445

METHODOLOGY: CRV

VIEWER IDENTIFIER: 018  
-----

1. (S/NF/SK) MISSION: See tasking cover sheet, attached.

2. (S/NF/SK) VIEWER TASKING: Initially, coordinates only. 018 was then directed to the target building, then the target room, and finally (in Stage 6) instructed to describe the target. (For this exercise 018 chose to use a self-cue of "tasker importance").

3. (S/NF/SK) COMMENTS: On target. The monitor has discovered that although 018 does not like them, breaks should be scattered liberally throughout these sessions. Otherwise, AOL drive prevails over data. It has taken two years of joint work to identify this problem.

## memorandum

DATE: 2 December, 1987

REPLY TO  
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

SG1J TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics: Viewer: 018  
Session date: 2 DEC 87  
Mode of operation: CRV

## 2. (S-SS) Summary of session results:

*Build down* →  
a. The overall area surrounding the target appears to be a group of structures located in uneven land, with flat, smooth, manmade areas on it. These structures are generally tall, long, and narrow. There is a "wooden" feel to them.

*Room* →  
b. One particular structure has a large room in which there is a table and chairs. This room has the overall "feel" of a conference room. The room appears to be longer than it is wide (see drawing, p. 7A). The points on the drawing give the following impressions:

1) Point (1) is "something sticking up". During the session, there was the AOL Signal of "Podium", but after session feelings are that this is the "present" location of the object labeled point (4) (see below).

2) Point (2) is a long area between the table and the near wall which seems to be curving upward with a strong curve near the floor, tapering out into a straight vertical wall.

3) Point (3) gave the impression of a mildly unattractive girl in military uniform who, for some reason, was accompanied by the feeling that she was "important".

4) Point (4) was located from the cue to find what was important to the tasker. This object is large (+/- 4 feet tall) and squarish. It has a very solid feel to it, but moves easily around the room. There seems to be a cavity inside it's top (see sketches, p. 10), and some "bumps" or "dots" on its side which give the A/S of "knobs". This object appears to have plain sides, which have the texture of stainless steel. The object seems, however, to be colored blue to blue/black.
